

Endurance 3825

Ruggedized Router

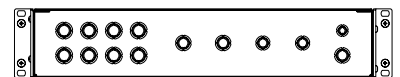

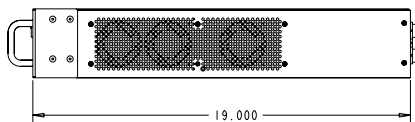

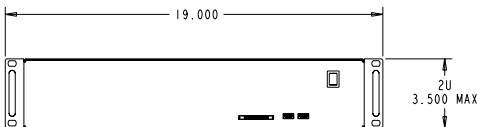

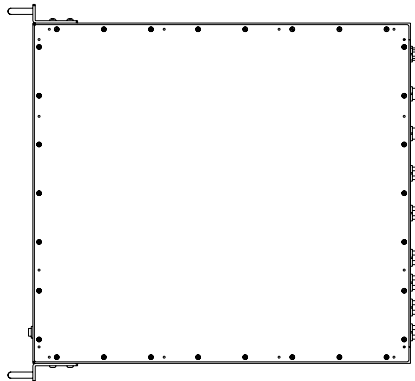

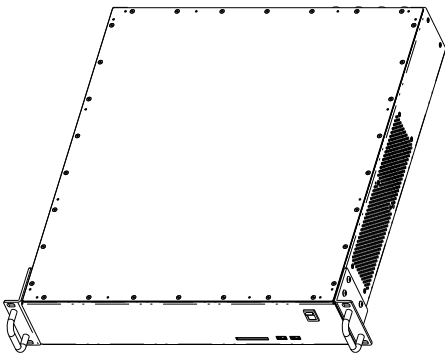

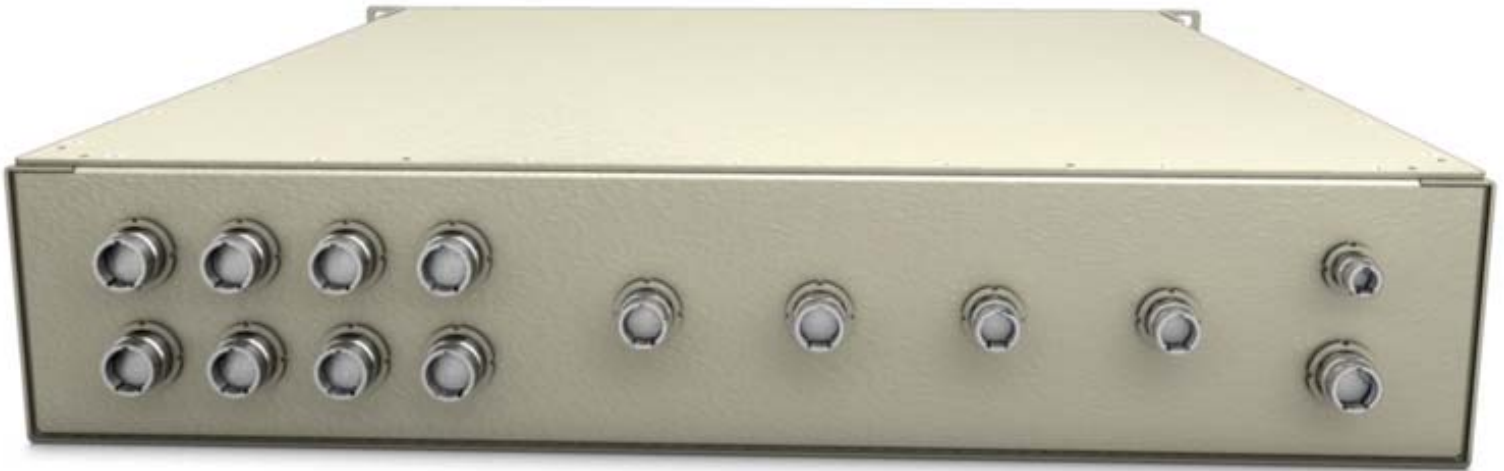

Product Information

The Marathon 3825 is a superior Commercial Off the Shelf (COTS) for IP networking applications. A rugged version of the Cisco 3825, the Marathon 3825 leverages the power of Cisco IOS® software, Catalyst® Layer 2 LAN switching and flexible Layer 3 WAN routing in one platform. Designed to provide the performance and reliability required for keeping vital applications connected the unit features embedded security processing, high memory capacity and high-density interfaces.

This rugged router meets MIL-STD-901D Grade B shock levels and MIL-STD-461 EMC requirements making it ideal for many rugged environments and particularly suited for naval ship installation. Able to support port autosensing, QoS and VLAN capabilities and featuring two copper Gigabit Ethernet uplinks, sixteen 10/100 Ethernet ports and eight Asynchronous/Synchronous RS-232 serial ports the Marathon 3825 is a leveraged solution for rugged router needs across many industries and environments.
